and Build On Your Business

There's no need to spend extra time, resources and money developing applications on your own platform. Now there's a better way. The Pro-Watch® Integration Program powered by the Niagara^{AX} Framework® offers a unique opportunity for authorized Honeywell Integrated Security (HIS) integrators to develop customized applications that can help you grow your business. And, once you're certified as a developer you can utilize your customizations for any customer you wish—creating repeatable business and adding more profit to your bottom line.

Honeywell's Pro-Watch Integration Program combines professional training, certification and graphical toolsets into a single offering—enabling easy implementation that reduces development time so you get your solutions to market faster. And if you're looking to integrate security with building, industrial or enterprise systems, its open architecture allows extensive integration resulting in increased operational efficiencies and better productivity.

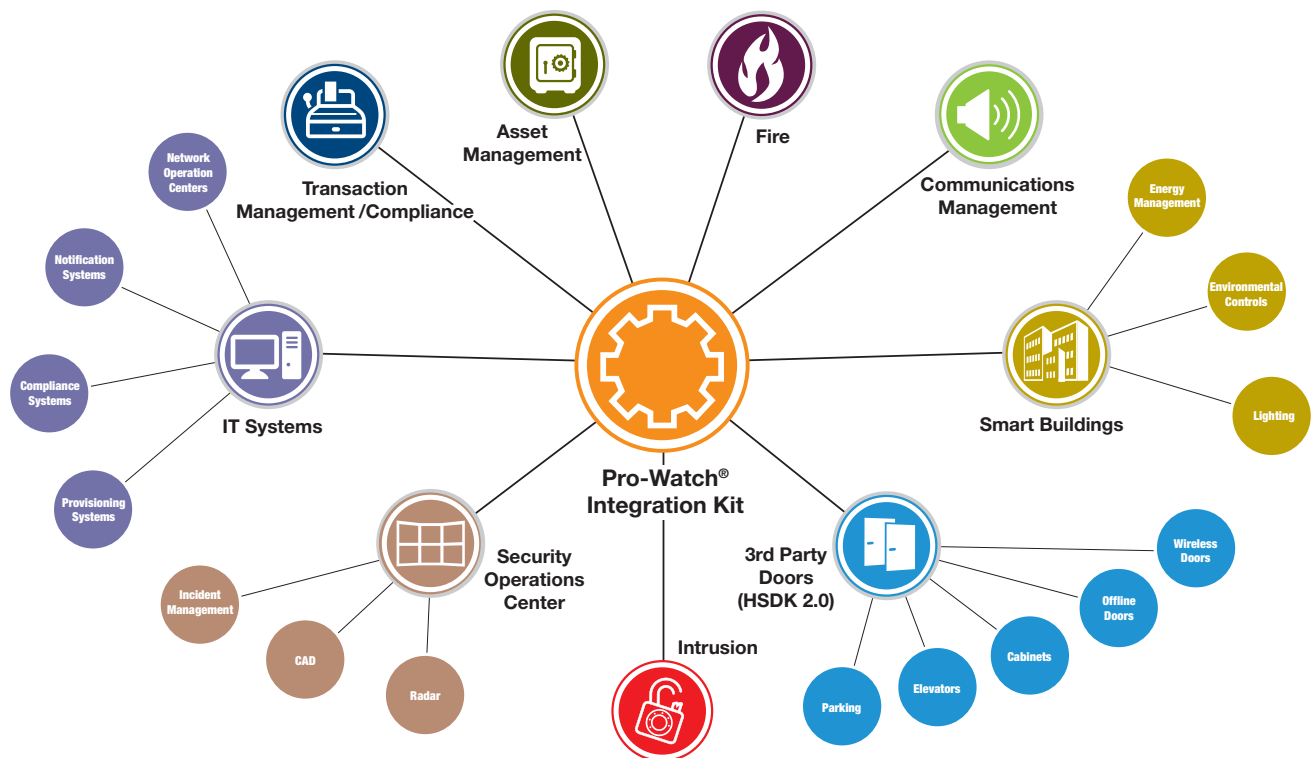

Building smart solutions for your customers has never been so easy!

Pro-Watch® Integration Program

The platform for the Pro-Watch Integration Program is composed of an interconnected ecosystem that allows your customers to drive effortless integration to any third party system, resulting in cost savings and increased efficiencies in building management and operations. From access control and video surveillance to the integration of logical security, asset management, secondary fire and smart building controls—like energy management—the Pro-Watch Integration Program is designed to provide customized applications and modules that meet your customers' needs today and tomorrow.

NOTE: The Pro-Watch Integration Kit is compatible with Pro-Watch 3.81 Corporate Editions and above.

Ask for a copy of our real world examples of successful installations and see how easy it is to build customized applications with the Pro-Watch Integration Kit.

Get It. Build It. Sell It.

Because the Pro-Watch Integration Kit is composed of graphical software tools powered by the Niagara^{AX} Framework, you can count on it. Its unified development platform is the premier building operating system with more than 260,000 installations globally and 12,000+ trained developers. And with an open technology platform, which includes extensive sample source code and comprehensive documentation, creating and licensing your own products and solutions is a breeze. It works with any protocol and supports legacy and open standards, in both wired and wireless environments.

Pro-Watch[®] Integration Program

Get It.

Training

- 1 week of Niagara TCP/AX training at Tridium, Inc. for 1 employee (with materials and certification included).*
- 6 hours of HSDK 1.0 to Niagara webinar*

* Requires passing grade on final examination.

Certification

- Sign-up fee
- First-year Pro-Watch Software Support Agreement (SSA)
- Pro-Watch Integration Program certificate

Build It.

Pro-Watch Integration Kit

- 1 developer license for HSDK 1.0
- 1 Niagara WorkBench graphical developer platform
- 1 JACE-600 hardware developer platform

Sell It.

- **Increase profitability**—customize applications quickly, saving you time and money
- **Gain a competitive edge**—expand your portfolio and resell what you build to similar customers and/or adjacent markets
- **Reduce costs**—maximize your investment in staff by training a senior-level technician instead of a dedicated software engineer

Getting Started

Requirements, Training and Certification

We're committed to making doing business with Honeywell a positive experience. So you'll find that the requirements, training and certification process for the program are practical and efficient —making your participation in the program worth your time and investment.

Program Requirements

Initial (First Year)

- Certify 1 developer
 - Advanced Pro-Watch training
 - Niagara TCP/AX training
 - HSDK 1.0 to Niagara webinar
- Purchase 1 Pro-Watch Integration Kit
 - HSDK 1.0 demo system
 - Niagara WorkBench interface
 - JACE-600
- Submit application
 - Sign-up fee
 - Developer Agreement

Annual (Subsequent Years)

- Maintain 1 certified developer on your staff
- Install 2 program-based sites per year
- Maintain a Pro-Watch Software Support Agreement (SSA)

Developers seeking certification must be an HIS integrator in good standing and approved by Honeywell. Additionally, developers shall comply with the program requirements as defined in the developer agreement.

Ordering the Pro-Watch Integration Kit

The Pro-Watch Integration Kit consists of HSDK 1.0, JACE-600, Niagara WorkBench, first-year Pro-Watch Software Support Agreement (SSA) and program training and certification.

Part #: PWHSDKDEVKIT

Ask for a copy of our real world examples of successful installations and see how easy it is to build customized applications with the Pro-Watch Integration Kit.

Training and Certification

Training

- **1 week of Niagara TCP/AX training at Tridium, Inc. for 1 employee, including training materials and certification.**

The 5-day Niagara^{AX} training, which will conclude with a certification exam* at one of Tridium's University Learning Centers. Class schedules and registration for approved developers can be viewed at www.tridiumuniversity.com.

Benefits of Tridium certification include:

- Lower costs and minimized risk
 - Increased efficiencies free you from time-consuming, high-cost development functions
 - Reduces time required in project development so you get to market quicker
- * Requires passing grade on final examination

NOTE: Developers should register under the "Honeywell Security" brand. After registration, the registrant will receive a confirmation email detailing the outline of the course and any applicable pre-training materials. It is recommended that any pre-training materials be completed in advance of the course.

- **6 hours of HSDK 1.0 to Niagara Webinar**

The HSDK 1.0 to Niagara webinar consists of two 3-hour sessions. It is recommended that prior to attending the webinar, the registrant identify a specific project he/she can reference during the webinar training. (Passing grade on exam required)

NOTE: Developers who order the PWHSKDEVKIT should designate a senior technician to receive the advanced program training.

Certification

- **Receipt of a Pro-Watch Integration Program certificate**
- **Exclusive access to the Pro-Watch Integration Program portfolio**
- **"Certified Integrator" listing on the HIS website**
- **Notice of your certification will be featured in the HIS Security Insights newsletter**

We're Behind You with Support and Resources

Honeywell is committed to providing you with superior support and resources. Our trusted experience, combined with the quality and reliability of our products and services, helps our customers meet their existing and emerging security challenges.

When you invest in the Pro-Watch Integration Program, you get:

- ✓ Professional support from Honeywell regional sales representatives and global account managers
- ✓ Access to expert application engineers during the pre-sale and specification process
- ✓ Toll-free number for technical support
- ✓ Dedicated email support for help and troubleshooting within 24 hours
